

**INTERCOMS**

## SPEAK THROUGH INTERCOM

**P**rotection of employees does not exclude conviviality in their dealings with the public. As proven by the IG 1800 intercom system which permits hands-free dialogue in an integrated duplex unit. This system is ideally suited to closed-window counters where people have to speak to each other through a glass or plexiglass window, made necessary by considerations of hygiene or security: banks, savings trusts, public buildings, museums, historic monuments, cinemas, theatres, betting shops... not forgetting prisons.

### REFERENCE

 **IG 1800**
